

- ATTENTION
- THE PLANET IS IN DANGER!!!!

The climate change is here

- The ice will melt in the poles
 - Sea levels will rise
- The ozone layer is disappearing

The forests are disappearing , the photographs shown are a reality check, but it is important to point out how the natural vegetation has been progressively diminishing. A process that seems to be irreversible.....

- Only 25 years separate these images...

Friends of Nature

Let us band together to save the forests!

We still have time....

- BEFORE THIS HAPPENS!!!!

**TOTAL
DEPLETION
OF THE
FORESTS!!!!**
