

The Volkswagen plant

**The impeccable work of
the Germans!**

Translated from Dutch – Cornel 10/2010

Exterior of the factory ... Does it not look like a HOSPITAL?

There is a special train for visitors ... Right to the entrance!

The other one is for deliveries ... Comes directly from the factory!

**But pay
ATTENTION!**

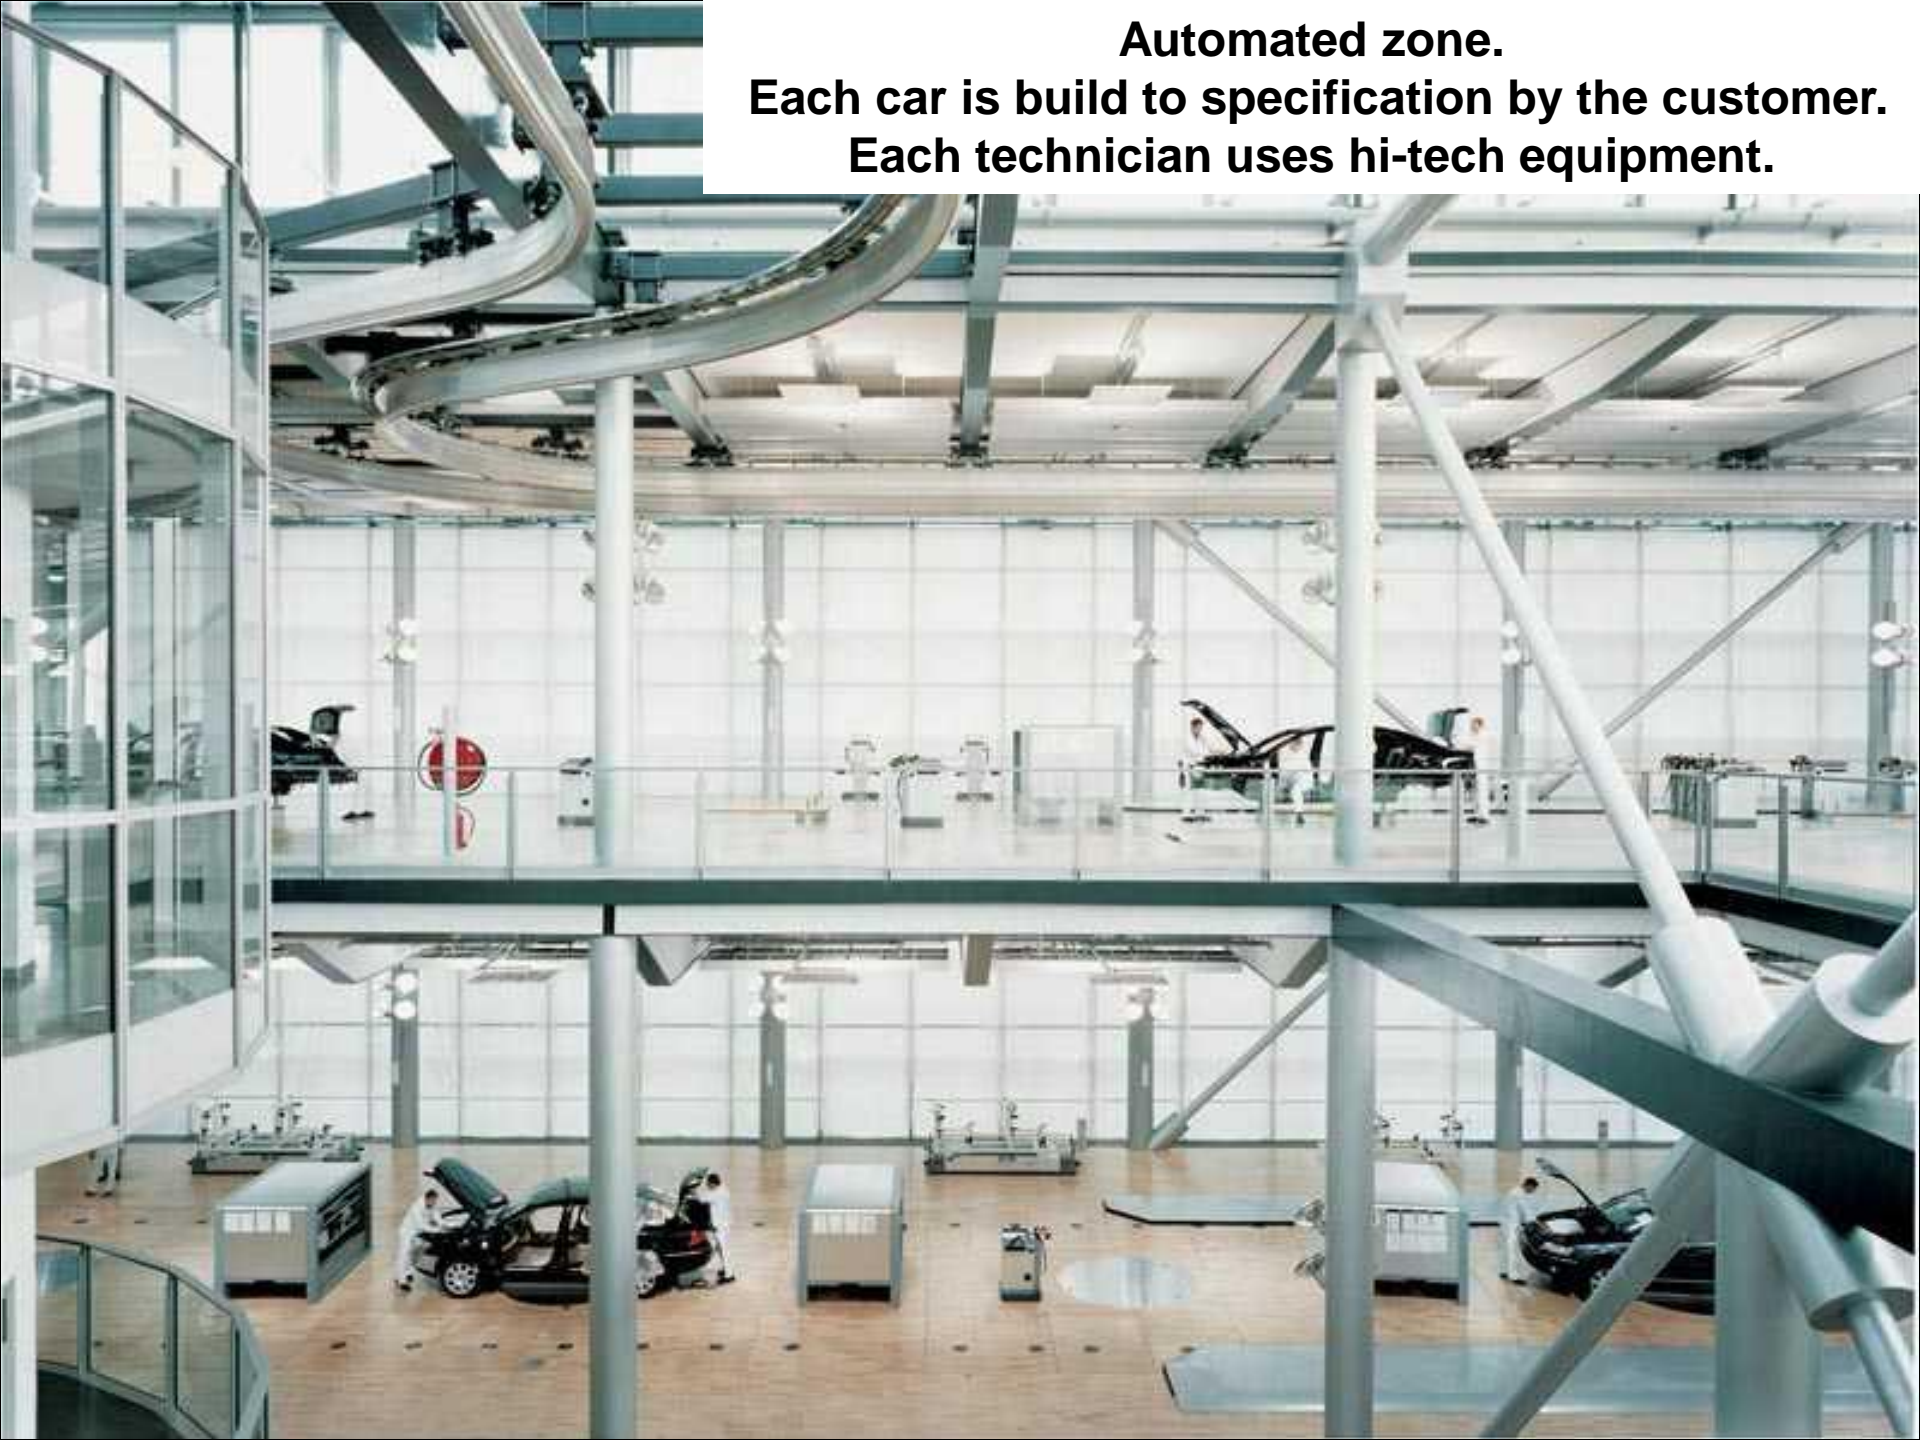

**On the outside
everything looks
spectacular ...**

**But you will see
that the inside is
even more
amazing.**

**You have no idea
how advanced
this all is.**

Have a look !

Automated zone.
Each car is build to specification by the customer.
Each technician uses hi-tech equipment.

This floor is actually an assembly line and proceeds to the rhythm of the addition of each part after a thorough inspection.

The assembly line is marked with large dots.

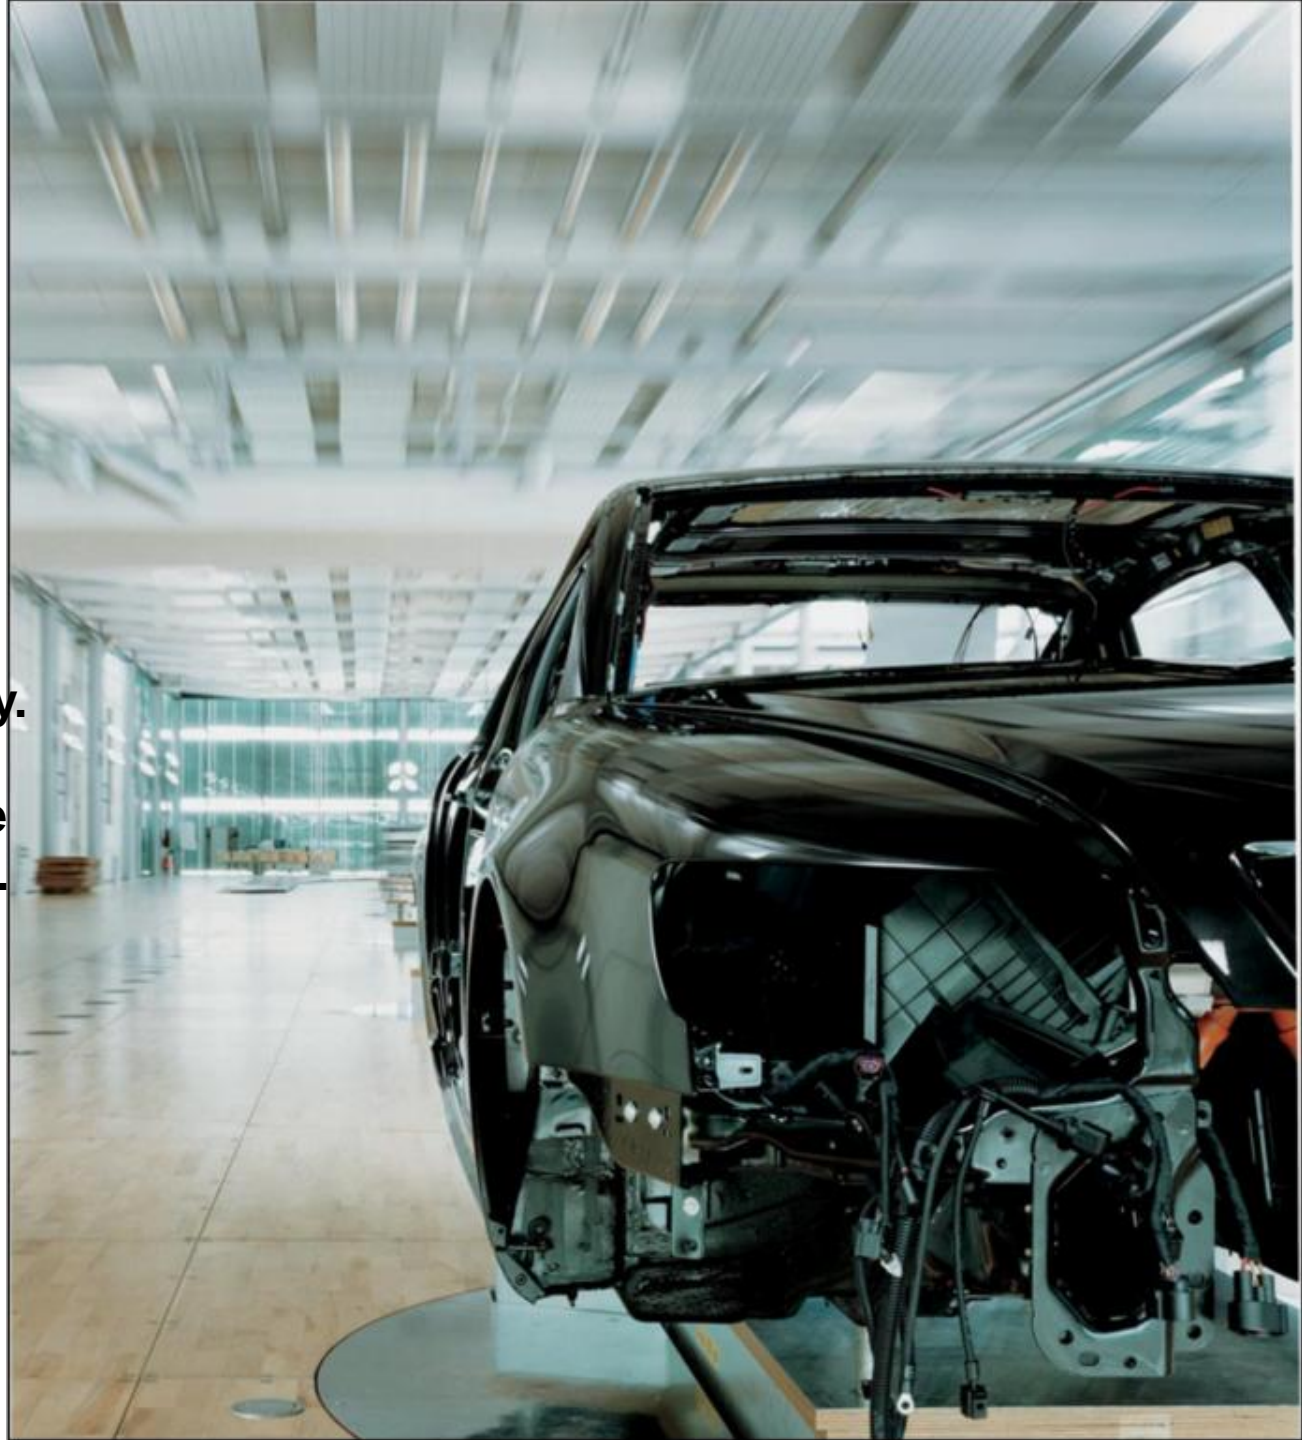

The technicians are mounting parts inside the body of the car.

**Each post assembly post
has its own
hydraulic bridge.**

**The large dots left
mark the moving
floor that runs continuously.**

**And if the technicians have
to work on the underside...**

... There are these "cranes" which move in all the directions.

They are telescopic, so the car can be positioned in any desired position very precisely.

A series of mobile cranes: an assembly line ...

... Which brings the car right next to the parts, not vice versa.

An assembly that is done ... as if they were plastic toys!

The engines are mounted, along with the transmissions (right).

Everything is assembled according to the wishes of the customer: engine, chassis, type and color of the body.

Look at the control Instruments: they are completely electronic

All required tools are available, perfect and precise.

WHITE is the color of the work clothes: everything must be perfect!

Only the mask and gloves of the surgeon are missing!

THE END OF THE ASSEMBLY!

The finished cars have to be placed somewhere ...

A VW Polo is loaded into the "car tower" in the factory in Wolfsburg (Germany).

This tower is a showcase for the visitors who are welcomed every Wednesday (approximately 5,000 per week) when this huge showcase is full. In this factory not only Volkswagens are build, but also Audi's, Bentleys and Lamborghinis.

THANKS FOR VISITING!

A photograph of a modern glass building at dusk. The building features a prominent cylindrical tower and a lower section with a sloped roof. The sky is a mix of blue and grey, suggesting twilight. The foreground is a grassy area with scattered brown leaves. The text "the END" is overlaid in a large, bold, red font across the center of the image.

the **END**
